

# ReactJS Hands-on - My First React App

Setting up a React environment with create-react-app

## 1. Objective

Create a new React application named **myfirstreact** and run it so that it displays **"welcome to the first session of React"** as a heading on the page.

## 2. Prerequisites

- Node.js
- NPM
- Visual Studio Code

## 3. Install create-react-app

Installed Node.js and NPM, then installed create-react-app globally using the command prompt.

● ● ● Command Prompt

```
C:\Users\student> npm install -g create-react-app
changed 1 package in 4s
```

## 4. Create the React App

Created a new React application named "myfirstreact" using the following command.

● ● ● Command Prompt

```
C:\Users\student> npx create-react-app myfirstreact
Creating a new React app in C:\Users\student\myfirstreact.

Installing packages. This might take a couple of minutes.
Installing react, react-dom, and react-scripts...

Success! Created myfirstreact at C:\Users\student\myfirstreact
Happy hacking!
```

## 5. Navigate into the Project Folder

● ● ● Command Prompt

```
C:\Users\student> cd myfirstreact
C:\Users\student\myfirstreact>
```

## 6. Open the Project in Visual Studio Code

Opened the myfirstreact folder in Visual Studio Code and navigated to src/App.js.

● ● ● Visual Studio Code - myfirstreact

```
myfirstreact
├─ node_modules
├─ public
└─ src
  ├─ App.js ← open this file
  ├─ App.css
  ├─ index.js
  └─ index.css
```

## 7 & 8. Replace App.js Content

Removed the default content of App.js and replaced it with the code below.

App.js

```
import React from 'react';

function App() {
  return (
    <h1>welcome to the first session of React</h1>
  );
}

export default App;
```

## 9. Run the Application

● ● ● Command Prompt

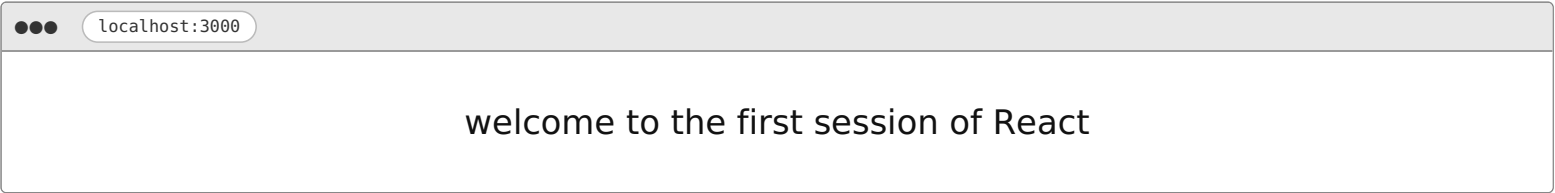

```
C:\Users\student\myfirstreact> npm start
Compiled successfully!

You can now view myfirstreact in the browser.

Local:      http://localhost:3000
On Your Network:  http://192.168.1.5:3000
```

## 10. View the Output in the Browser

Opened a new browser window and navigated to **localhost:3000**.

The heading renders exactly as returned by the App component, confirming the React app was set up and run successfully.
