

SQL Exercise - Views (Answers)

Exercise 1: Create a Simple View

SQL Code:

```
CREATE VIEW vw_EmployeeBasicInfo AS
SELECT e.EmployeeID,
e.FirstName,
e.LastName,
d.DepartmentName
FROM Employees e
JOIN Departments d
ON e.DepartmentID = d.DepartmentID;
```

Output Screenshot:

EmployeeID	FirstName	LastName	DepartmentName
1	John	Smith	HR
2	Emma	Davis	IT
3	Liam	Brown	Finance

Exercise 2: Add Computed Column - Full Name

SQL Code:

```
CREATE VIEW vw_EmployeeFullName AS
SELECT EmployeeID,
FirstName + ' ' + LastName AS FullName
FROM Employees;
```

Output Screenshot:

FullName
John Smith
Emma Davis
Liam Brown

Exercise 3: Add Computed Column - Annual Salary

SQL Code:

```
CREATE VIEW vw_EmployeeAnnualSalary AS
SELECT EmployeeID,
Salary,
Salary * 12 AS AnnualSalary
FROM Employees;
```

Output Screenshot:

EmployeeID	Salary	AnnualSalary
1	5000	60000
2	6500	78000
3	7000	84000

Exercise 4: Add Multiple Computed Columns

SQL Code:

```
CREATE VIEW vw_EmployeeReport AS
SELECT e.EmployeeID,
e.FirstName + ' ' + e.LastName AS FullName,
d.DepartmentName,
Salary * 12 AS AnnualSalary,
(Salary * 12) * 0.10 AS Bonus
FROM Employees e
JOIN Departments d
ON e.DepartmentID = d.DepartmentID;
```

Output Screenshot:

EmployeeID	FullName	DepartmentName	AnnualSalary	Bonus
1	John Smith	HR	60000	6000
2	Emma Davis	IT	78000	7800
3	Liam Brown	Finance	84000	8400
