

ReactJS Hands-On - Student Management Portal

1. Objective

Create a React app named StudentApp with three components - Home, About and Contact - each displaying a welcome message, and render all three from App.js.

2. Prerequisites

Node.js, NPM, Visual Studio Code

3. Create the React Project

Command typed in the VS Code terminal:

```
npx create-react-app studentapp
```

4. Components Folder

Under the src folder, a new folder named Components was created, containing Home.js, About.js and Contact.js.

5. Home.js

```
import React, { Component } from 'react';

class Home extends Component {
  render() {
    return (
      <div>
        <h2>Welcome to the Home page of Student Management Portal</h2>
      </div>
    );
  }
}

export default Home;
```

6. About.js

```
import React, { Component } from 'react';

class About extends Component {
  render() {
    return (
      <div>
        <h2>Welcome to the About page of the Student Management Portal</h2>
      </div>
    );
  }
}
```

```
export default About;
```

7. Contact.js

```
import React, { Component } from 'react';

class Contact extends Component {
  render() {
    return (
      <div>
        <h2>Welcome to the Contact page of the Student Management
Portal</h2>
        </div>
      );
    }
  }

export default Contact;
```

8. App.js - Invoking All Three Components

```
import React from 'react';
import Home from './Components/Home';
import About from './Components/About';
import Contact from './Components/Contact';

function App() {
  return (
    <div className="App">
      <Home />
      <About />
      <Contact />
    </div>
  );
}

export default App;
```

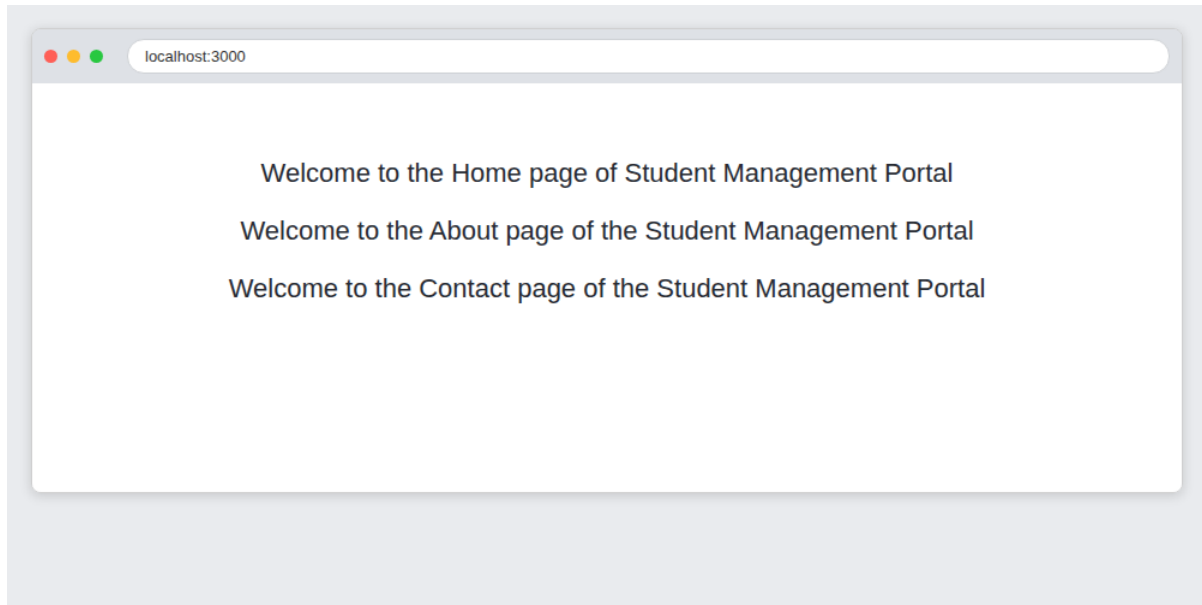

9. Run the Application

Command typed in the terminal, inside the studentapp folder:

```
npm start
```

10. Output - localhost:3000

Browser output after opening localhost:3000:

11. Observation

All three components - Home, About and Contact - are rendered on a single page through App.js, each displaying its respective welcome message for the Student Management Portal.
